Medication Verification & Exchange

Integration of bi-directional home medication and prescription information across the hospital enterprise has been completed.

Using HL7 Pharmacy Treatment Orders for the exchange of home medication and prescriptions and Pharmacy Treatment Administration transactions for medications administered in the ED, Wellsoft now supports complete patient medication information exchange with these clinical content providers:

- ♦ First Data Bank
- ♦ RxNorm
- ♦ Elsevier's Gold Standard Clinical Pharmacology*

Support for other content providers, such as NDC, Micro-Medex and Cerner® Multum are in development.

* Used for Wellsoft EDIS medication reconciliation and allergy alerts.

"Wellsoft met our integration needs for managing patient medication information at CentraState. The use of HL7 messages to provide real-time medication verification between Wellsoft EDIS and our hospital wide medication information repository is helping CentraState maintain patient safety."

Indranil (Neal) Ganguly, FHIMSS
Vice President, Chief Information Officer
CentraState Health Care System

CentraState Medical Center in Freehold, NJ, a Wellsoft EDIS client since 2004, added Wellsoft EDIS Medication & Verification Exchange Features and interfaces in December, 2009.

Wellsoft Welcomes New Customers

- ♦ **Lourdes Medical Center Burlington Campus Satellite ED - Browns Mills, NJ**
Wellsoft has been selected for a third ED in the Lourdes Health System. The Lourdes Medical Center Burlington Campus Satellite ED Go-Live is planned to coincide with the Satellite ED opening.
- ♦ **Marietta Memorial Hospital - Marietta, OH**
Wellsoft interfaces with **MEDITECH Magic** at Marietta Memorial Hospital and is an important component of the hospital's IT infrastructure. Marietta Memorial Hospital, which provides healthcare for over 31,000 ED patients each year, is now live with Wellsoft EDIS.
- ♦ **Richmond Memorial Hospital - Rockingham, NC**
Wellsoft EDIS will be implemented in a second hospital for FirstHealth of the Carolinas. Richmond Memorial Hospital, which serves over 27,000 ED patients each year, anticipates Go-Live with Wellsoft EDIS in the spring of 2010.

Ridgeview Medical Center 17th Anniversary with Wellsoft!

First Wellsoft EDIS Client Remains On Cutting Edge

Ridgeview Medical Center, in Waconia, Minnesota is a non-profit, 109-bed hospital that provides emergency services for 22,000 patients every year.

1993: Installed Wellsoft's Discharge Instructions

1995: Installed Wellsoft's first generation EDIS "Wellsoft Integrated Clinical Management System"

With patient tracking, clinical documentation, order tracking, discharge management and prescriptions, Ridgeview Medical Center has efficiently managed their ED since 1995.

2010: Scheduled to install Wellsoft EDIS v11

Enhanced clinical documentation, bi-directional order entry and results, and facility and professional charge capture will be added to expand their EDIS functionality and enhance interoperability with their McKesson Paragon hospital wide system.

"This upgrade will improve and enhance patient safety and staff efficiency in the Emergency Department."

*Dr. Bruce Hubbard
President
Emergency Physicians and Consultants, P.A.*

"We are very excited about continuing our relationship with Wellsoft, the EDIS vendor we have worked with successfully over the last 17 years."

*Marilyn Foss
Director of MIS*

E-Prescribing Coming Soon

Wellsoft is currently in the implementation and certification process to become a SureScripts® Certified Solutions Provider™ and developing the data exchange elements needed (NCPDP SCRIPT version 8.1) to safely send electronic emergency visit prescriptions to SureScript's Pharmacy Health Information Exchange™.

Benefits include:

- ◆ Secure electronic prescriptions delivered to any of 51,000 retail pharmacies (84% of the retail pharmacies in the US) and/or six of the largest mail-order pharmacies.
- ◆ Prescription benefit checking including coverage status and formulary information from leading payers, plans and pharmacy benefit managers connected to the SureScripts network.
- ◆ With patient consent, all prescriptions are checked for potentially harmful interactions with a patient's other medications using SureScripts prescription history service.
- ◆ With patient consent, physicians and prescribers can access patient prescription histories.

General Availability is planned for 2Q 2010.
