

# Wellsoft® EDIS

## Emergency Department Experience in Canada

### Wellsoft Emergency Department Information System

Wellsoft Corporation provides the most comprehensive range of features and most customizable product in the EDIS marketplace. Clients choose the specific functionality that meets their needs and utilize any combination of wireless, laptop and desktop workstations. Wellsoft EDIS is configured to tightly weave the software into the workflow of Emerg and Emerg staff.

Wellsoft meets the needs of each Emergency Department, including: *Adult & Paediatric Emerg Departments, Fast Tracks, Walk In Clinics & Urgent Care Centers, Community Hospitals, Teaching Hospitals, Enterprise/*

*Multi-Location Hospital Emergency Departments, Trauma Centers (Levels I, II and III) and Emergency Medicine Residency Programs.*

#### Support for Canadian ED Requirements

##### Canadian Emergency Department Information System - CEDIS

- Meets national, provincial and regional requirements for electronic information and tracking systems
- Accommodates custom workflow and site requirements

##### Canadian Triage and Acuity Scale - CTAS

- Meets CTAS criteria
- Supports chief complaints defined by CEDIS
- Supports paediatric subset of CEDIS chief complaints
- Patient Visit Record with CTAS Score Integration
  - *The ED patient's unique visit information and CTAS value is sent to the hospital registration system via an outbound HL7 interface*

##### EMS Notification and Update Protocol

- Real time updates to Toronto EMS system
- Location and status automatically updated and displayed

##### Patient Identification

- Integration with Health Identification Cards
- Emerg Patient "swipes" card and the patient encounter record is populated with
  - *Health care id number, province of residency, and identification codes*
- Automatic merging of all previous demographic information
- Automatic identification of presenting patient health indicators

##### Wait Time Reduction Initiative

- Capture and report on all required data elements utilized by the province
- Eliminate the need to manually capture, compile and report mandated data elements

##### Infection Control and Response

- Dynamic updating of institutional protocols and forms to support Infection Control and system reporting
- Incorporate the latest Ministry of Health guidelines in data capture and reporting

#### Consultative Services, Implementation & Ongoing Support

A defining feature of Wellsoft EDIS implementation is the level of workflow consulting provided by Wellsoft project managers.

Wellsoft provides:

- Project Management
- Work Flow Analysis, Design and Customization
- On-Site Implementation
- Consultative Services
