

Wellsoft® EDIS

Multi-Facility/Enterprise Support

Wellsoft Supports Multi-Facility Emergency Departments

The Wellsoft EDIS Enterprise Edition addresses the specific needs of multi-hospital/multi-facility organizations.

One of the central features of the Enterprise Edition is the inclusion of the Wellsoft Clinical Data Repository (CDR) module which houses copies of all ED visits from all facilities in the healthcare organization. This module can be accessed by select ED staff from each facility to retrieve relevant patient clinical information in real time. It can also be used by administration for generating detailed reports for one or all emergency departments within the enterprise.

Individual hospitals within an enterprise have the option of sharing common data elements and assessment documentation. A directory of follow-up referral physicians, for example, can be stored as part of a shared enterprise-wide staff directory. If one facility updates contact information for a specific provider, this information is instantly updated and accessible by all facilities.

Modifications to Wellsoft EDIS can be made at a specific site without affecting the EDIS at other EDs within the enterprise. Wellsoft Enterprise clients enjoy the benefits of custom software solutions for each of their facilities in addition to having the ability to harness the power of shared data elements available to them.

Select Wellsoft Multi-Facility Clients

- **Aria Health (Formerly Frankford Hospitals)**

- Aria Health – Bucks Campus
- Aria Health - Frankford Campus
- Aria Health - Torresdale Campus

- **Huntsville Hospital**

- Huntsville Hospital—ED
- Huntsville Hospital—Pediatric ED
- Madison Urgent Care

- **Lourdes Health System**

- Lourdes Medical Center of Burlington County
- Our Lady of Lourdes Medical Center
- Satellite Emergency Department (2010)

- **The Nebraska Medical Center**

- The Nebraska Medical Center
- Clarkson West

- **St. Vincent Health**

- St. John Health System
- St. Joseph Hospital
- St. Vincent Hospital
- St. Vincent Hospital—Carmel
- Peyton Manning Children's Hospital
- St. Vincent Medical Center Northeast

- **Thomas Jefferson University Hospitals (TJUH)**

- Thomas Jefferson University Hospital (2010)
- Jefferson Hospital for Neuroscience (2010)
- Methodist Division of TJUH (2010)

- **Universal Health Services**

- 6 EDs in 2009

Wellsoft Enterprise Features & Capabilities

- Wellsoft Clinical Data Repository (CDR)
- Ability for each hospital to have its own view of patients on the Wellsoft Tracking Display
- Ability to share data elements
- Ability to retrieve ED patient visit history in real-time across the health system
- Ability to standardize care, documentation, orders, core measures and risk management for all facilities
- Ability to generate enterprise and site-specific reports
- Common user interface across the system
- Financial savings with consolidated server hardware and software
